To Whom It May Concern,

I am writing this to express my interest in the Software Developer position at your company. I had recently graduated with a Diploma in Information Technology from Nanyang Polytechnic before enlisting for National Service. I have gained relevant experience in various full-stack development projects and throughout my internships. Your business model of making buy and sell simpler and more meaningful strongly resonates with my passion for building user-focused digital products.

During my time as a Software Developer Intern at NTUC Enterprise, I assisted with developing internal dashboards using React and Chart.js, created backend services with Express.js and SQLite, and worked together with one of their Agile development teams. I also held a part-time role as an IT Support Intern supporting franchise F&B operations, where I automated staff scheduling with JavaScript, and managed operational data across multiple outlets. These experiences helped me grow both more technical and professional while also understanding the challenges of supporting scalable, real-time systems.

- Developed a full-stack internal dashboard at NTUC Enterprise using React and Express.js, improving operational data access for 5 departments.
- Automated scheduling for over 120 F&B staff across 6 outlets, reducing weekly manual input time by huge margins (60%).
- Created dynamic visualizations using Chart.js to enhance reporting accuracy for business teams.

I really like how Carousell is evolving beyond just listings – with things like verified products, secondhand services, and even car sales. It'd be awesome to be part of a team that builds features people can trust, while working on scalable UI systems and improving API performance – areas where I'm more confident and would fit right in to.

Thank you for considering my application. I'd love the opportunity to further discuss how I can contribute to Carousell's engineering team. You can reach me at +65 8298 7284 or email chewnballs@gmail.com. I'll follow up next week if I don't hear back. Thanks again for your time and consideration.

Sincerely,

CHOON LIN
